Professional Experience

Web Developer (Freelance / Contract)

2022 – PRESENT

- Delivered and deployed 6+ production-grade digital systems for schools and local government units (LGUs), enhancing operational efficiency and user engagement.
- Engineered secure PHP/MySQL backends and responsive front-ends using Bootstrap, HTML, and CSS, ensuring seamless user experience across devices.

Instructor – Computer Programming

2023 – PRESENT

- Teach Java and Python, focusing on clean code and data-driven design.
- Mentor students through practical projects using MVC and API-based systems.

System Created

- MaQuizta – Android quiz and assessment app with question banks, timed exams, item analysis, and modules.
- SCMAVS – School management system with attendance tracking, class management, and admin reporting.
- FaceLog – Face-recognition attendance and DTR system with live scan, templates, and audit logs.
- CMS Libertad – Crime Records and Analytics System for the Libertad police with RBAC and case tracking.
- LLA Traveler Portal – Responsive traveler information portal for public use.
